SUMMARY

I am a passionate Full-Stack developer with expertise in Next.js and TypeScript, specializing in building real-time, interactive web solutions. With a strong interest in emerging technologies, including Generative AI, I am eager to leverage my skills to contribute to projects that enhance user engagement and push the boundaries of creativity across various fields

SKILLS

Programming Languages	Python, JavaScript, C++, Typescript
Web Development	HTML, CSS, React, Node.js, Bootstrap, Next.js, Sanity, ReactJs, Express, ShadCn, Tailwind Css
Database Management	MongoDB, Postgress, Prisma, Firebase, SupaBase, Neon
Soft Skills	Communication, Teamwork, Problem Solving
Industry Knowledge	Version Control (Git), GitHub, Content Management System

EDUCATION

Bachelor of Engineering (B.E.)

P.E.S Modern College of Engineering, Shivajinagar, Pune, Pune, Maharashtra

- Currently pursuing a Bachelor of Engineering (B.E.), emphasizing **Artificial Intelligence** and **Machine Learning** (AIML). Developing a solid foundation in **AI**, **machine learning**, and **data structures**, while also being actively involved in **Web Development**, showcasing a strong capacity for creating innovative solutions.

PROJECTS

Ai-PromptFusion

NextJs,FireBase,Clerk,ShadCn,KravixStudio

[GitHub](#)

- **AI-Prompt Fusion** is a powerful multi-AI response platform built with **Next.js**, **React**, **Tailwind CSS**, **Firebase**, **Clerk**, and **KravixStudio** that enables users to send a single prompt to multiple AI models simultaneously and compare their responses in real time. It features a sleek, responsive, and interactive interface with real-time data updates, secure authentication, and dynamic visualization of AI outputs. Designed for developers, researchers, and enthusiasts, the platform showcases advanced skills in full-stack development, API integration, and modern UI/UX design while delivering an intuitive, scalable, and performance-driven experience.

MockMate

NextJs,Ai-gemini,Clerk,Neon,DrizzleORM

- **MockMate** is an AI-powered interview preparation platform built using **AI-Gemini**, designed to simulate real-world interview experiences and help users refine their communication and problem-solving skills. It intelligently generates realistic interview questions, adapts its follow-ups based on user responses, and provides detailed, personalized feedback to improve performance. By combining adaptive AI interactions with insightful analytics, MockMate enables users to build confidence, identify weaknesses, and enhance overall interview readiness in a dynamic and engaging way.

Maverick-Threads

Next.js, Sanity, Clerk, Shadcn

[GitHub](#)

- Created a robust e-commerce website named **Maverick-Threads** utilizing **Next.js**, **Sanity**, **Clerk**, and **Shadcn**. Enhanced user experience with **Passkey authentication** through Clerk, dynamic product management via Sanity, and implemented essential features such as shopping cart, checkout, and secure payment processing alongside **bill generation** using jsPDF.

DevStream

ReactJS,RapidAPI

[GitHub](#)

- **DevStream** | *React.js, RapidAPI*
- Developed a **YouTube-like video streaming platform** using React.js and RapidAPI, allowing users to **search, browse, and watch videos** seamlessly. Implemented a **responsive, dynamic UI** for an engaging user experience and integrated YouTube data through RapidAPI for real-time content fetching and display.
